## SCROLLUP

### SHOW INSTRUCTIONS

- DISPLAYS THE MOST IMPORTANT USAGE INSTRUCTIONS WITHIN THE STACK

### TOPBAR CONTROL

- ALLOWS SCROLLUP AND USER CONTROL OF TOPBAR COLORS
  - YOU CAN USE TOPBAR WITHOUT THIS ENABLED BUT YOU WILL NOT BE ABLE TO STYLE DROPDOWNS, ENABLE DROPDOWN FADE-IN OR HAVE SCROLLUP AUTOMATICALLY MAKE THE TOPBAR TRANSPARENT

### FIXED POSITION

- FIXED POSITIONING FOR THE SCROLLUP STACK. ALWAYS USE THIS FOR TOPBAR AND FIXED FOOTERS.

#### POSITION:

- THE REFERENCE TO WHICH THE OFFSET IS APPLIED.

#### OFFSET:

- OFFSET HOW FAR UP OR DOWN THE SCREEN FROM THE REFERENCE POSITION

#### Z-INDEX:

- HIGHER NUMBERS BRING SCROLLUP IN FRONT OF OTHER SCREEN ELEMENTS.

### HIDE OVERFLOW

- HIDE CONTENT THAT IS BIGGER THAN THE SIZE OF THE SCROLLUP STACK AS SET IN THE HEIGHT SETTING BELOW. ENSURE THIS IS OFF FOR USE WITH MENUS WHERE THE DROPDOWN CONTENT MUST OVERFLOW

THIS IS USEFUL FOR THINGS SUCH AS FOOTERS SO THAT YOU CAN SHRINK THE SCROLLUP HEIGHT TO 0 BEFORE SCROLLING. A POSITIVE HEIGHT WHEN SCROLLED WILL THEN ALLOW THE CONTENT TO APPEAR

## IMPORTANT:

IF YOU WANT SCROLLUP TO TRANSITION AS A PARTICULAR ELEMENT OF YOUR PAGE COMES IN TO VIEW, THEN ALWAYS USE PERCENTAGE UNITS. IF THE BROWSER WINDOW IS RESIZED, SCROLLUP RECALCULATES THE ABSOLUTE POSITIONS OF THE SCROLL TRIGGER AND THE TRANSITION WILL OCCUR AT THE SAME RELATIVE POSITION ON THE PAGE.

IF USING PIXEL UNITS BE AWARE THE PAGE HEIGHT IN PIXELS WILL BE DIFFERENT FOR DIFFERENT BROWSER WIDTHS. IF YOU WANT TO SHOW CONTENT AT A PARTICULAR POINT DOWN THE PAGE, ALWAYS USE PERCENTAGE UNITS.
